PROFESSIONAL SUMMARY

Computer Technology graduate (awaiting conferment) from The Technical University of Kenya with hands-on experience in IT support, network administration, endpoint security, and cybersecurity fundamentals. Cisco Networking Academy certified in Endpoint Security, Introduction to Cybersecurity, Networking Basics, Networking Devices, Packet Tracer, and Computer Hardware Basics. Proven track record resolving hardware/software/connectivity issues, reducing downtime by ~35%, and implementing zero-loss backup protocols. Strong foundation in secure coding (JWT, RBAC), LAN/WiFi administration, and workstation hardening. Remote-ready professional comfortable with distributed teams and asynchronous tools (Slack, Discord, Notion, Jira). Seeking full-time or part-time remote/hybrid roles in IT Support, Cybersecurity Operations, Network Administration, or related technical positions.

KEY ACHIEVEMENTS

- Completed 7 Cisco Networking Academy certifications covering Endpoint Security, Cybersecurity, Networking, Packet Tracer, and Hardware Basics.
- Reduced average operational downtime by an estimated 35% through systematic hardware, software, and network diagnostics across workstations.
- Designed and implemented automated daily backup protocols for confidential business records — zero data-loss incidents over 2+ years.
- Administered LAN routing, WiFi troubleshooting, endpoint software updates, and workstation hardening in a live business environment.
- Built and secured 6+ applications with JWT authentication, role-based access control (RBAC), and secure coding practices.

TECHNICAL SKILLS

Cybersecurity & Networking: Endpoint Security, Network Security, Introduction to Cybersecurity, JWT Authentication, Role-Based Access Control (RBAC), Secure Coding, LAN/WiFi Administration, Router Configuration, Workstation Hardening, Cisco Packet Tracer, Network Design & Initial Configuration

IT Support & Hardware: Hardware Diagnostics, Computer Hardware Basics, Workstation Setup & Hardening, Automated Backups, Endpoint Software Updates, Connectivity Troubleshooting

Systems & Tools: Linux CLI, Git, GitHub, Postman, VS Code, Android Studio, Chrome DevTools, Vercel, Render, GitHub Actions

Backend & APIs: Python, Flask, Node.js, Express.js, RESTful APIs, Prisma ORM, Firebase, Google OAuth 2.0, Safaricom Daraja (M-Pesa), Africa's Talking SMS

Databases: PostgreSQL, MySQL, Firebase Firestore, Supabase

Frontend (supporting): React.js, React Native, Next.js, TypeScript, Tailwind CSS, JavaScript (ES6+), HTML5, CSS3

Methodologies: Agile/Scrum, TDD (Jest + Supertest), MVC, UML/ERD/DFD Modelling

CERTIFICATIONS

Cybersecurity • Introduction to Cybersecurity (Cisco Networking Academy, Nov 2023) | Endpoint Security (Cisco Networking Academy, Jul 2026)

Networking • Networking Basics (Cisco, Aug 2026) | Networking Devices and Initial Configuration (Cisco, Aug 2026) | Get Connected (Cisco, Nov 2023) | Getting Started with Cisco Packet Tracer (Cisco, Jul 2026)

Hardware • Computer Hardware Basics (Cisco Networking Academy, Nov 2023)

EDUCATION

Bachelor of Technology in Computer Technology | The Technical University of Kenya | 2022 – 2026

All final-year coursework complete. Currently completing mandatory 12-week Industry Attachment (ending Mid-October 2026). Graduation scheduled after attachment. Core areas: Network Design, Database Administration & Security, Information Systems Security, Software Development, Mobile Applications, Web Design & Development.

Kenya Certificate of Secondary Education (KCSE) | Maranda High School | 2015 – 2018 | Mean Grade: B Plain (69)

WORK EXPERIENCE

IT & Technical Support Assistant (Part-time) | 2022 – Sep 2024

- Diagnosed and resolved hardware, software, and connectivity faults across workstations, reducing average operational downtime by an estimated 35%.
- Administered LAN routing, WiFi troubleshooting, and endpoint software updates across all systems.

- Designed and implemented automated daily backup protocols for confidential business records, achieving zero data-loss incidents during tenure.
- Managed digital insurance portal claims and financial records using enterprise ledger software.

Industrial Attachment (Mandatory – 12 Weeks) | In-progress | Expected Oct 2026

- Completing 12-week mandatory attachment covering Network Design, Database Administration & Security, Information Systems Security, Software Development, Mobile Applications, and Web Design.
- Gaining hands-on industry experience across 16 specialized areas of computing and information technology.

SELECTED TECHNICAL PROJECTS

Boresha-Mama – Digital Health Platform | Solo Developer | Dec 2025 – Jun 2026

Architected a 4-app digital health ecosystem. Implemented JWT authentication with bcrypt, role-based access control (RBAC) for 4 user roles, and secure API design. Integrated SMS gateway for automated reminders.

Tech: React Native, Node.js/Express, PostgreSQL, JWT, RBAC | **Result:** 4 apps + API | 77 automated tests (100% pass rate)

Lux Stay – Premium Rental Platform | Solo Developer | 2025

Full-stack web application with Google OAuth 2.0, role-based access, and database-level constraints to prevent double-booking. Secure admin CRUD panel and multi-step booking flow.

Tech: Next.js 14, TypeScript, Prisma, Supabase, OAuth 2.0 | **Result:** 12+ listings across 5 cities | Double-booking prevention

Moyo – Social Networking Platform | Solo Developer | 2026

Mobile platform with JWT authentication, phone verification, real-time messaging, and M-Pesa payment integration. Focus on secure user data handling and access control.

Tech: React Native (Expo), Express.js, Prisma, PostgreSQL, Safaricom Daraja | **Result:** JWT auth, secure messaging, payment flow

Naju Poultry – Business Website | Solo Developer | 2026

Lightweight business site with Firebase Firestore backend, dynamic product catalog, zone-based delivery fees, and full admin panel for inventory monitoring.

Tech: HTML5, Tailwind CSS, Vanilla JS, Firebase | **Result:** 5-page responsive site + admin dashboard

REMOTE WORK & COLLABORATION

Proficient in asynchronous communication and distributed team workflows. Tools: Slack, Discord, Notion, Jira, GitHub. Self-directed project management with clear documentation and regular status updates across time zones.

LANGUAGES & AVAILABILITY

Languages: English (Fluent) • Swahili (Native)

Availability: Immediate • Remote-Ready • Open to Full-Time or Part-Time roles in IT Support, Cybersecurity Operations, Network Administration, and related technical positions
