PROFESSIONAL SUMMARY

Computer Technology graduate (awaiting conferment) from The Technical University of Kenya with proven experience in full-stack software development, IT operations, and technical support. Built 6+ production-grade applications independently, including a digital health platform, premium rental marketplace, and social networking app. Remote-ready professional with experience working across distributed teams and multiple time zones. Proficient in asynchronous communication tools (Slack, Discord, Notion, Jira) and self-directed project management. Seeking full-time remote Software Engineering or IT Operations positions.

EDUCATION

Bachelor of Technology in Computer Technology

2022 - 2026

The Technical University of Kenya

All final-year coursework complete. Currently completing mandatory 12-week Industry Attachment (ending October 2026). Graduation scheduled after attachment. Demonstrated excellence across 16 areas: Network Design, Database Administration & Security, Software Development, Mobile Applications, Information Systems Security, Web Design & Development, and more.

Kenya Certificate of Secondary Education (KCSE)

2015 - 2018

Maranda High School | Mean Grade: B Plain (69)

TECHNICAL SKILLS

Frontend	React.js, React Native, Next.js, TypeScript, Tailwind CSS, HTML5, CSS3, JavaScript (ES6+)
Backend	Node.js, Express.js, Flask, Firebase Firestore, Prisma ORM
Databases	PostgreSQL, MySQL, Firebase, Supabase (PostgreSQL + Storage)
Dev Tools	Git, GitHub, Postman, Linux CLI, Chrome DevTools, VS Code, Android Studio, Vercel, Render, GitHub Actions
APIs	RESTful APIs, Africa's Talking SMS, Google OAuth 2.0, Safaricom Daraja (M-Pesa), Cloudinary
IT & Security	LAN/WiFi, router setup, hardware diagnostics, workstation hardening, JWT, RBAC, secure coding
Methodologies	Agile/Scrum, TDD (Jest + Supertest), MVC, UML/ERD/DFD Modelling, Responsive Design

PROJECT PORTFOLIO

Boresha-Mama - Digital Health Platform

Solo Developer | Dec 2025 - Jun 2026

Architected a 4-app digital health ecosystem using React Native, React.js, Node.js with Express.js, and PostgreSQL. Integrated Africa's Talking SMS Gateway for automated reminders via node-cron. Implemented JWT authentication with bcrypt and role-based access control for 4 user roles.

Tech: React Native, React.js, Node.js, Express.js, PostgreSQL, Africa's Talking

Result: 4 integrated apps + 1 API | 77 automated tests | 100% test pass rate

Lux Stay - Premium Rental Platform

Solo Developer | 2025

Engineered a full-stack web application using Next.js 14 (App Router), TypeScript, Tailwind CSS, Zustand, Prisma ORM, and PostgreSQL via Supabase. Multi-step booking, Google OAuth 2.0, role-based access, and full admin CRUD panel.

Tech: Next.js 14, TypeScript, Tailwind CSS, Prisma ORM, Supabase

Result: 12+ listings across 5 cities | Double-booking prevention via DB constraints

Moyo - Social Networking Platform

Solo Developer | 2026

Built a full-stack mobile platform with Express.js REST API, Prisma ORM, PostgreSQL, and React Native (Expo SDK 52). Swipe-based matching, real-time messaging, phone verification, Cloudinary image uploads, and M-Pesa STK Push integration.

Tech: React Native (Expo), Express.js, Prisma ORM, PostgreSQL, Safaricom Daraja

Result: JWT auth, swipe mechanics, match management, real-time messaging

Naju Poultry - Business Website

Solo Developer | 2026

Lightweight static site using HTML5, TailwindCSS (CDN), and Vanilla JavaScript with Firebase Firestore as the serverless backend. Dynamic product catalog, zone-based delivery fees, and a full admin panel with inventory monitoring.

Tech: HTML5, Tailwind CSS, Vanilla JS, Firebase Firestore

Result: 5-page responsive site with complete admin dashboard - zero traditional backend

jobw.dev - Portfolio Website

Solo Developer | 2025

Custom single-page portfolio using semantic HTML5, custom CSS3 (dark/light theme toggle), vanilla JavaScript, Space Grotesk + Inter typography, and Plausible.io analytics.

Tech: HTML5, CSS3, Vanilla JS

Result: Accessible portfolio with cursor-glow effects, smooth scroll, responsive design

WORK EXPERIENCE

IT & Technical Support Assistant (Part-time)

2022 - Sep 2024

- Diagnosed and resolved hardware, software, and connectivity faults across workstations, reducing average operational downtime by an estimated 35%
- Administered LAN routing, WiFi troubleshooting, and endpoint software updates across all systems
- Designed and implemented automated daily backup protocols for confidential business records, achieving zero data loss incidents during tenure
- Managed digital insurance portal claims and financial records using enterprise ledger software

Industrial Attachment (Mandatory - 12 Weeks)

In-progress | Expected Oct 2026

- Completing 12-week mandatory attachment covering Network Design, Database Administration & Security, Software Development, Mobile Applications, Information Systems Security, and Web Design
- Gaining hands-on industry experience across 16 specialized areas of computing and information technology
